** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. STATEMENT**

Novelty (N)	Claims <u>1-14</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-14</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-14</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-14 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the use of a detent sub-assembly housed in a bushing located in a panel mounted rotary switch assembly or the method of operation. Rose teaches the use of a detent sub assembly mounted in a housing component 1 which in turn is mounted to a printed circuit board 2. The housing component encapsulates the detent assembly including its subassembly components at 19,22,25,26. The Rose component 1 is a housing component and does not constitute a bushing component. Rose fails to disclose a bushing component that has an upper end extending through the panel on the user's side. The bearing bushing 12 extends downwardly from the upper surface of the housing component 1 and retains a shaft in fixed relationship to the rotor and the housing component.

Claims 1-14 meet the criteria set out in PCT Article 33(4), and thus the rotary switch with the unique detent subassembly has industrial applicability because the subject matter claimed can be made or used in industry.
